Subject: contents of extraneous files from Shaw on Pavillion

Dave:

As requested, I went through the files submitted by Shaw again. Files consisted of:

- Field activity logs (already posted)
- Analytical results of well development water and cuttings (already posted)
- Invoices (not posted)
- Health and safety logs including site entry and air monitoring logs (not posted)
- Well completion schematics (not posted but used for the Draft EPA report and thus already public)
- Well development logs (not sure if these are posted)
- Copies of emails (not posted)
- MSDSs (some not posted, others apparently inaccurate given field activity logs and photo-documentation)

Shaw needs to respond to my previous email on MSDSs.

If the well development logs are not posted, they need to be posted. However, most (not all) entries appear to be in field activity logs already. All well development logs were included in the response to comments on drilling and well construction.
